Mannville School Work Display

An Honorarium of \$18.00 is awarded to each classroom for **full class participation**.

School curriculum encourages the participation and enjoyment of artistic concepts as a purely personal achievement. Therefore, each child has the opportunity to select **one or two** pieces of his/her year's work in Art. Artwork is expressed in many different media and material.

Competition is not an element in artistic expression and therefore, no prizes are awarded.

**We hope you enjoy the creative art display from the students at
Mannville School!**

APPENDIX

Tips on Presenting an Attractive Display – according to Judging Criteria

Flowers – Clean fresh flowers free from bugs and blemishes, and uniform in size, shape, color and harmony.

Containers – suited to flower. Not too decorative to take away from flower. Container is in proportion to size and type of flower.

Long Stemmed Flowers – Use tall vases with narrow openings. Leaves stripped off the bottom of stem that is in the water. Flowers such as a gladiolas, arrange snug in container so it doesn't move around.

Individual Blooms – such as cosmos and calendula are shown with only one open bloom per stem in narrow container of appropriate height

Multiple Blooms – such as sweet pea, stock, phlox and snapdragons, the more open blooms the better the exhibit

Individual Blooms – such as petunias, tuberous begonia, pansy and viola, only the flower is judged. Remove stems and foliage.

Containers for Individual Blooms – shallow with foil covers and large enough so that flowers do not touch
Example ... margarine tubs – cut center of the lid out and leave raised edge. Place foil (shiny side down) over container and snap down lid. Punch small holes in foil for stems, making sure flowers don't touch. Cut stem so it will be in water but bloom rests on foil. Or use shallow plastic food storage containers. Drill small holes in lid.

Floral Arrangements – In arrangements the container and the use of fillers and accessories enhance your display. Accessories examples are mats, doilies, marbles, candles, figurines, etc. Filler examples are baby's breath, goutweed, nanking cherry, peony etc. No oasis must be used.

Lilies – Little emphasis is put on number of open flowers. A stem with a single perfect open flower will rate higher than one with many flowers open of which not all are perfect.

Best condition is when – lower flowers are open but not fading, upper flowers still in bud, free from disease and insect damage, anthers are present and petals not stained with pollen.

Arrangement Size Standards:

Miniature – are not to exceed 7 ½ cm (3") in any direction including container base and accessories. To be viewed from all sides.

Cup and Saucer – are not to exceed 20 cm (8") including container base and accessories. To be viewed from all sides.

Dining Room Table – are not to exceed 30 cm (12") including container base and accessories. To be viewed from all sides.

Coffee Table – are not to exceed 15 cm (6"). To be viewed from all sides.

Buffet or Side Table – viewed from only one side. You should state what type yours is and where you are planning to display it.

Judging Criteria For Vegetables

Color - should be bright, clean and attractive. A rich dark color is preferred.

Condition - free from blemishes that are caused by insects, disease, dirt or mechanical damage.

Size - should be of moderate size. Usually oversized vegetables are coarse, tough and lacking in flavor.

Uniformity - all items in a display should be similar size, color, maturity and shape.

Specific Vegetables

Beans - Uniform pod length, color typical of variety and free of blemishes and bruises. Pods should be crisp, fresh and free from stringiness and fiber.

Beets - Deep red color including crown. Top should be trimmed and roots should have no side hairs and when cut should not have white rings.

Cabbage - Firm, moderate-sized heads, free of insect damage, with stalk removed but some of the outer leaves left.

Cauliflower - Heads 5" to 8" in diameter with a firm white curd. Firm stems and no leaves showing through the curd.

Cucumber - Pickling: Under 3" long and should be unblemished with no yellow underside. Stems attached, but blossom removed. Slicing: Over 3" long, but blossom removed. Slicing: Over 3" long, uniform and with same criteria as pickling cucumbers.

Corn - Ears of uniform size and evenly filled and should be shown with 1/3 of husk removed.

Potatoes - Uniform size and shape. Clean and free from disease and blemishes with shallow eyes. No greening or sunburn. Tuber can be washed or just cleaned with a soft brush or cloth, but do not break the skin.

Tomatoes - smooth, uniform size and shape; shown with stem **on**.

Zucchini - Smooth, small-sized and uniform.

Fruits - All varieties should be named if possible. They must be shown with their stems attached. All fruits should be clean, free from blemishes and uniform size and shape. Apples and crabs may be polished with a soft cloth to improve their shine.

Kohlrabi – trim root and leave a few leaves on top

Onions – trim root hairs ½ inch

Leeks – leave some ripe outer skins – trim root hairs ½ inch

Garlic Bulbs – trim root hairs ½ inch

Rhubarb – leave small fan of leaf and root remnant attached
